Upsilon Pi Epsilon
Computer Science Honor Society at RPI

Who Are We?

Upsilon Pi Epsilon (UPE) is the international honors society for the computing and information disciplines. Our members are students who show excellence in their studies and enjoy giving back to the computer science community by tutoring and hosting exam review sessions.

What is the Programming Competition?

UPE organizes a computer programming competition every semester for members of the RPI student body. It is a two-hour event in which students solve innovative technical problems of varying difficulty.

Why Sponsor Us?

The competition is a great opportunity for companies to advertise to skilled problem solvers and programmers in the student body!

If you are interested in sponsoring or have any questions, contact Alexandra Hsueh at hsueha@rpi.edu or 732-524-8054!

Sponsorship Levels

General Sponsor: $250

The general sponsor level is intended for smaller companies looking to advertise without making a large commitment. Your company name and logo will be shown on all advertisements for the event. You can also send swag which will be distributed to students who attend the event.

Event Sponsor: $500

The event sponsor level is intended for mid-sized companies interested in hiring students for internships or full-time positions. You will be given all of the benefits of the general sponsor in addition to the ability to view resumes, student competition scores and code samples. You can also provide a slide to be shown during the event about your company.

Top Sponsor: $750-$1000

Only one company will be featured as the top sponsor at each programming competition. This level consists of all of the benefits of an event sponsor in addition to naming the competition after your company and the ability to be part of the problem choosing process. You are also welcome to give a presentation at the event and provide a direct link to job applications at your company which will be provided to all participating students. For this level, we are very open to additional questions or feedback, so feel free to reach out to the event organizer, Alexandra Hsueh, with any comments or requests.
